

Operation and play value

When allowed to flow, you can see and feel all the vitality and power inherent in the medium of water. You can dam the water or make it flow by turning the plastic disc.

Fundamental characteristics

- exclusive design
- easy operation

Suitable

- for children from 3 years of age
- for all water play areas in play and adventure spaces

Planning information

The damming disc should not come into contact with sand (for reasons of functionality, i.e. turning the disc).

Damming Disc

Technical information

basic construction made of stainless steel

asymmetrical revolving disc made of plastic

Dimensions

(small deviations possible)

height	0.29 m
width	0.27 m
damming height	0.06 m
weight	approx. 5 kg

Safety check according to EN 1176

Components

1 part

Installation information

paved surfacing

foundations depending on the installation situation
