

HortLoam

HortLoam contains coarse sand and additional reserves of organic matter, giving it a more open and free-draining structure.

This provides the optimum environment for establishing young plants and encouraging healthy root growth.

HortLoam's coarser texture is ideal for shrub and vegetable planting schemes, podium projects, raised beds, and the planting of rootball trees.

A premier planting topsoil, compliant to **BS3882:2015**.

- ✓ Shrub beds
- ✓ Raised beds
- ✓ Planting trees
- ✓ Vegetable planting projects

- Optimum nutrient levels
- Valuable horticultural properties
- Fully analysed
- Compliant to BS3882:2015
