

Inham Nook Play Area

Inham Nook Play Area is a great example of a modern design!

Client Testimonial

"The Borough Council has a good working relationship with Proludic, who has a unique range of imaginative and inspiring play equipment. The impressive facility at Inham Nook Recreation Ground has been very well received locally and many more young people now use and enjoy the park, which is exactly the outcome we desired!"

Chris Riley, Broxtowe Borough Council

Client
Vinci Construction Ltd.

Location
Bramcote,
Nottingham
Value
£142,000

Challenge

With the construction of a second tram line running through the heart of an existing old play area, Broxtowe Borough Council, NET transport and Vinci Construction were required to provide the local residents a new and modern play space that would provide children between the ages of 2-14 a safe and exciting environment. Situated adjacent to tennis courts, football pitches, fitness equipment and a cycle route, the new play area would be the final element to this large open space.

Proludic Solution

The team at Proludic, led by Area Manager Adam Dickerson liaised closely with Broxtowe Borough Council to establish a "wish list" via consultation with local schools and the assessment of other recent successful local play projects. The brief given was to provide 3 separate areas to include a Toddler Zone, a Junior Zone and a Space Net. Key features that needed to be included was the provision of large, multi-activity climbing structures that catered for young and older children, the provision of swinging elements and ensuring there were activities that provide other moving sensations such as bouncing and spinning. To ensure the project reflected the modern, clean lines of the new tram system, the IXO Multiplay Unit was chosen to be the centre piece of the play area. This modern unit is predominatly constructed from galvanised and stainless steel and is large enough for 20+ users who can swing across the monkey bars, climb the net and walls, clamber through the rope tunnel, access any of the 4 decks via ladders, spin on the gyro and slide down the turbo slide.
