

# Adventure

(technical specification)

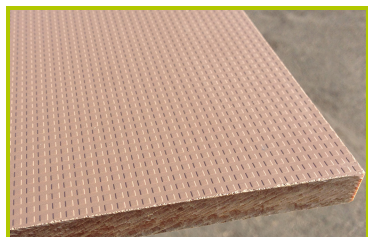

J2625

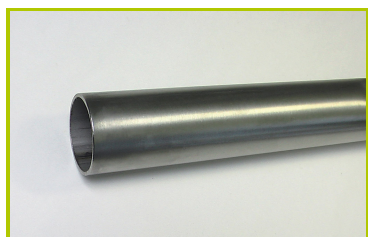

1- **Galvanised, painted steel posts 95x95mm**, guaranteed long term durability. The caps are made of injection moulded polyamide.

2- **The coloured panels** are made from a 13mm thick compact material (HPL). Robust in construction, it has excellent weather and vandal resistance properties.

3- **The platforms and the inclined element** are made from a 12.5mm thick textured and non-slip compact material (HPL).

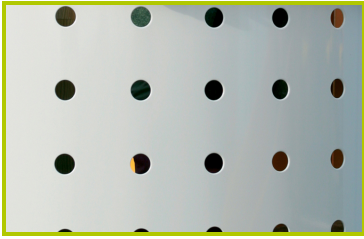

4- **The tubes** are made of 40mm diameter stainless steel, guaranteeing lasting durability and reliability of the equipment.

5- **The tunnel** is made of rotomolded polyethylene, 76cm in diameter.

6- **The sliding surface** is made of 2mm thick stainless steel, which is shaped, bent and rolled from one piece.

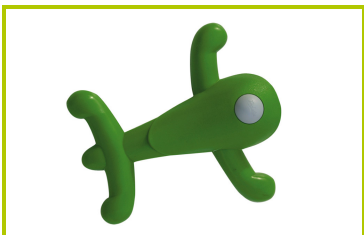

7- **The balcony** is made of 3mm perforated aluminium sheet, coated with polyester epoxy lacquer.

8- **The 16mm diameter rope** is made of galvanised steel cable covered with polyester.

9- **The ladder rungs** are made of acacia wood which is naturally rot-resistant and smooth to the touch.  
They are mounted on a 16mm diameter polyester cable.

10-**The climbing holds** are made of polyamide for its strength and rigidity.

11-**The fixings** are made of stainless or plated steel and protected by anti-vandalism polyamide caps.
