# For more than 30 years, Proludic has been designing, manufacturing and installing playgrounds and sports areas around the world

## Our mission

True to our values, we are focused on our mission of creating playgrounds and sports areas where users can thrive, develop their skills and improve their well-being.

We design, manufacture and install products and play spaces offering the highest quality and safety. Our universal, innovative and inclusive solutions are tailored to meet the wide range of needs among children, teenagers and adults.

We also strive to transform play areas into social hubs that promote and enhance community life.

## Our values

### Experience

Proludic can draw on the operational expertise it has developed since 1988 to provide customers with superior support and guidance in developing and implementing their projects.

### Innovation

Proludic harnesses its collective driving force to extend and upgrade its product range to reflect the changing needs of today's generations and tomorrow's world.

### Commitment

All our employees share the company's determination to see children thrive, while fostering well-being for everyone and enhancing customer satisfaction.

### Proximity

All around the world, local teams are ready to respond and bring a dedicated and professional approach to each playground and sports area project.

### Recognised quality

### Endorsed compliance with standards

### A certified environmental approach

### Award-winning designs

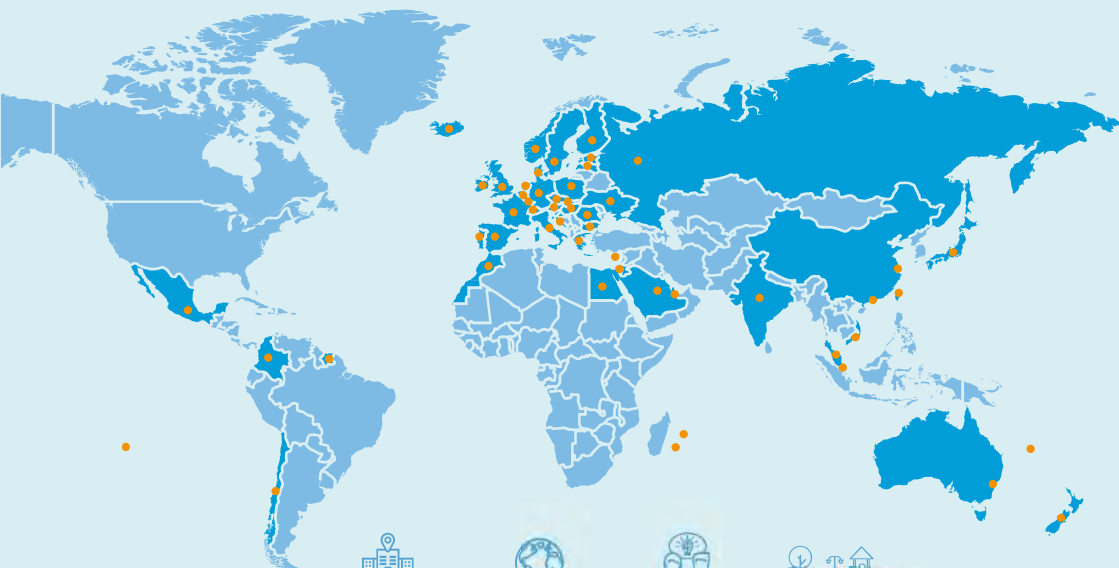

Learn more in our corporate video.

Our head office and manufacturing facility are based in Vouvray, France.

## International presence

**6**  
subsidiaries

**55**  
countries

**280**  
employees

**100 000 +**  
playgrounds  
and sports areas

# Integrated expert knowledge

## 1 Our in-depth knowledge of children is the driving force for every project

Every day, our teams are focused on leading projects that strengthen their expertise in children's developmental needs by:

- Working alongside **childhood specialists**.
- Gathering insights into the latest **lifestyles** and **trends**.
- **Observing and analysing** how children behave on their own and as part of a group within their educational play environment.
- **Planning to ensure that play experiences promote the development of children's motor, sensory, cognitive, creative and social skills.**

## Design: inextricably interwoven into Proludic's DNA

Proludic's in-house Research & Development Department is a powerhouse for pioneering innovative ideas that comply with applicable standards.

Our designers are responsible for masterminding leading-edge concepts and product ranges geared towards the expectations of children and adults alike. We also have a long track record in developing bespoke and personalised projects.

- 6 designers and 15 technical engineers.

## 3 Integrated manufacturing processes

To better deliver superior efficiency, flexibility and quality, Proludic's manufacturing and distribution functions are based out of the company's head office.

- 60 qualified workers.
- Ability to work with a wide **variety of materials**, including wood, metal, rope, composites and plastics.
- **Quality control** and testing on materials and equipment.

Production processes are controlled and managed entirely within the company, meaning that Proludic can manufacture custom products and unique designs with greater responsiveness.

## Landscape design 4

### Your project is unique to us!

Each project starts with an initial encounter. This allows us to get to know you as a client and understand your needs, so we can provide a tailor-made design solution in keeping with your brief.

Our combined knowledge and expertise ensures your needs will be carefully assessed, and that we will provide you with advice to ensure consistency across your play area project in terms of products, location, layout and environment. Following this consultation, we are then able to create the most appropriate project design to achieve a harmonious and attractive result.

- 200 salespeople in the field every day, throughout the world.
- Landscape designers at your service.

## 5 Installation & Project management

Proludic project manages each playspace project from the time you place your order, through to project completion - and beyond. Our services include:

- Installation of play and sports equipment
- Landscape integration
- General layout works
- Laying safety surfaces
- After-sales service
- Servicing and maintenance

We carry out all our work in line with the project objectives and in accordance with safety requirements.

## After-sales service 6

We are here to help, long after your project is installed. If there is anything you need, we will get back to you as quickly as possible.

### Our promise?

90% of requests processed within **24 hours**

80% of spare parts shipped within **5 working days**

### Get in touch!

By **phone** or via our **website**.

## Environmental policy

Children are at the heart of all that we do. Across all of our activities, we act to ensure their future by doing what we can to protect the environment.

The company's environmental policy drives us to take action on the sustainable use of natural resources, and in doing so, ensures a better quality of life for future generations.

### *Sustainable products and services*

Proludic has adopted a sustainability strategy focused on the optimised use of resources and the provision of services to support the lifespan of our products. This strategy helps limit our ecological footprint and that of our customers. Through these actions, Proludic commits to the quality and lifetime use of our products:

- Durable, sustainable and ethical materials that are recyclable
- Efficient after-sales service to support long-term product integrity
- Long-term spare parts availability ensuring product reparability
- Extensive guarantees up to 25 years

Proludic selects and uses 100% recyclable materials.

### **Metal**

Steel, stainless steel and aluminium are 100% recyclable (steelworks and refinery plants).

### **Compact**

Compact is 100% recyclable (energy production).

### **Plastic**

All our plastic parts are marked with standard international codes which ensure their traceability and suitability for recycling in the plastic processing industry.

### **Wood**

The plywood and laminated wood are 100% recyclable.

- Everybody at Proludic is committed to a sustainable development approach

We implement sustainability actions every day, such as:

- Waste sorting
- Reduction of paper use
- Optimised office lighting
- Minimising travel by using video conferencing
- Using reusable cups
- Use of renewable energy

Each Proludic employee does their bit!

# Play activities for stimulating interaction between children, to include everybody

At Proludic, inclusion is one of the cornerstones of our philosophy, because we believe that all children should have access to the same play activities and equipment.

## What is an inclusive play area?

An inclusive play area is a space featuring an accessible layout and a range of play equipment so that children can **express themselves, play together and progress at their own pace and to the best of their abilities.**

Our inclusive play areas offer products that have been **designed to accommodate various disabilities** (motor, visual, hearing and intellectual impairments, autism, etc.) without ever creating any stigma in how they are used or perceived.

Integrated play area

Inclusive play area designed by Proludic

All types of disability are taken into account

## What are the key considerations when designing an inclusive play area?

- **Improve access to equipment** by the presence of a ramp, low floors and safe steps. Offer several easy-access entrances.
- **Use colours, shapes, textures and sounds** to stimulate the senses and promote development.
- **Prioritise low-level activities** either inside or outside the play equipment to **encourage interaction.**
- **Provide a wide range of play equipment and activities** to meet the needs of many types of ability.
- **Provide simple activities with gradual progression in levels of difficulty** to stimulate children and enable success.
- **Provide equipment and spaces** that allow children to withdraw for **quiet periods.**
- **Create access paths and use appropriate ground markings** to facilitate movement around the play area.

Recipient of the  
Good Design Award

**Are you planning to create an inclusive play area?**

Ask for a copy of our "Inclusive play areas" catalogue, which illustrates our strong commitment towards children with disabilities.

We have designed our catalogue while **closely working alongside NovaChild**, a network of universal design experts, healthcare professionals and disabled children's associations committed to improving well-being for children through the power of innovation.

The catalogue features **appropriate solutions in terms of products and designs** to ensure that playgrounds can be enjoyed by everyone.

**6 GRAPHICS**  
are available in  
our catalogue

Original, innovative and audacious all at the same time, the Grafic Games decorative technique has been developed to personalise all our play structures. This technique allows a project to stand out from the crowd and brings real added value to your playground.

- Proludic's internal teams are experts in using this technique.
- The finish can be applied to **all compact composite and lacquered plywood panels**.
- The **varnish finish** improves the graphics' resistance to graffiti removers.
- The **warranties** are the same as for all HPL compact composite and lacquered plywood panels (25 years).

# Bespoke projects, you dream it... we create it

*At Proludic, the only thing that we like better than sharing in your dreams is turning them into a reality!*

Drawing strength from our expertise in design, engineering, manufacturing and installation, we combine creative flair, high standards to create unique and spectacular designs.

We relish the challenge of breaking with convention, starting with a blank canvas and breathing life into all our customers' ideas.

Our creations come to life in the most varied play environments with larger, taller, themed and completely personalised products.

## La Rochelle France

Valin Square is a symbolic location in La Rochelle's Old Port.

The playground is located halfway between the city and the coast. The design is influenced by the "relationship between the maritime world and children".

Identify our custom products and designs in this catalogue with this pictogram.

## All-Russian Exhibition Centre

Moscow - Russia

The playground has been fully personalised in the colours of Lukoil, Russia's largest oil producer.

All the items of play equipment are related to the activities involved in producing, treating and the use of oil.

## Imantas

Riga - Latvia

This playground reflects the city's international airport, which is located nearby.

The area is designed around a control tower and an aeroplane.

## Vestertorv Square

Kolding - Denmark

This impressive structure, designed in Robinia wood, (with an inner metal framework), represents an origami in the shape of a cloud.

It adds an architectural, poetic and refined touch to this square, located in the heart of a city where nature is omnipresent.

## MULTIPLAY EQUIPMENT

- Multiplay equipment is designed to make children move without them even realising!

For young children: the variety of play elements and how they're incorporated into the structures are designed to challenge their motor skills. At the same time, they encourage their curiosity and sense of discovery. For older children: there's an opportunity to put themselves to the test - to slide, climb, turn and cross - to go a little faster and take a few risks.

Multiplay equipment is all about getting children to be active. But it also has an important role in nurturing fun, joyful interactions between children by creating a place for a group of children to play together.

Diabolo is an essential component for any play area. With platforms ranging in height from 60cm to 177cm, and with many diverse play elements, the Diabolo range is suitable for children from 6 months to 12 years old.

The modular nature of this range allows for multiple combinations. These can be adapted to a specific age range, or used to encourage interaction between children with different capabilities due to age differences or ability.

The classic 'must-have' play features are included on each structural element. Varied and complex on more elaborate combinations, these features offer children more opportunities to discover, be challenged and have fun.

Diabolo is available in two colour palettes: "Zingy" (yellow, orange and green) and "Pastel and Wood" (lagoon blue, apple green and oak).

## INSPIRATIONS

PLAY-BASED  
MODULARITY  
INCLUSION  
COMPACT  
BRIGHT

## A range designed for the very young

The Diabolo Baby range is dedicated to early childhood. The structures are designed to encourage early learning, guiding young children through a sequence of activities which stimulate their motor and fine-motor skills, and support role-play and interaction with others.

All activities take place at ground level or at a maximum height of 60cm. All play elements are varied, relevant, adaptable and modular.

**NURSERY**  
**YOUNG CHILDREN**  
**MOTOR DEVELOPMENT**  
**LEARNING**  
**EARLY LEARNING**

**Diabolo Baby, a range meeting the developmental and well-being needs of children from 6 months to 2 years:**

**Helping young children discover new motor skills**

On all fours, children move forward in a confined space.

Moving forward on a slope, holding narrow shapes that are raised and spaced apart.

Moving in an area surrounded by empty space.

Going underneath.

Understanding obstacles

## Developing their sensorimotor and psychomotor skills

Encouraging fine motor skills through the movement of shapes along a defined path.

Exploring how different objects look: colours, transparency, distorted reflections, light/dark contrasts.

**Developing awareness of shapes (square, round, triangle)**

Resolving play tasks using the manipulation of simple shapes that use thought, memory, learning and reasoning.

Experiencing different textures (raised diamond shapes, grass effect, rough surfaces).

## Supporting their social development

Learning to play and interact with others.

**Developing their imagination through role play**

Encouraging children to help each other.

*Climbing, sliding, crawling, sharing, inventing... GROWING!*

MULTIPLAY EQUIPMENT

**GRAFIC  
GAMES**

**INSPIRATIONS**

The Vivarea range provides a variety of interesting and stimulating play activities for children aged 2 to 8 years, in a style that captures the sunny European climate.

The structures take their inspiration from Mediterranean villages nestled into the mountains, with varied levels, spaces, shapes and heights.

Semicircular terraces, narrow, straight walkways, clever variations in platform levels, closed or open playhouses; the equipment can be used by large numbers of children and it provides them with lots of activities to enhance learning and motor skills. The equipment range comes in a variety of combinations, with key opportunities for play and development, providing suitable options for small or larger play areas alike.

The Origin' range of play equipment recreates the very essence of what nature has to offer: a forest walk, crossing a stream over stepping-stones or an uprooted tree trunk, a playhouse made of fallen branches, an adventure trail that includes climbing, sliding and discovering.

Here, children play in a setting inspired by nature. Their senses are awakened and stimulated by the look and feel of the Robinia wood play structures.

The Kanopé range, with its structures resembling wild grasses or tree trunks bent by the wind, invites children to venture into nature.

Children from two years of age can navigate a pathway that's horizontal or vertical, steep or moving. They can climb in all directions, clambering up and down numerous uniquely-shaped rope structures. They can pretend to be acrobats or tightrope walkers. Or they can slide down a rope, a traditional slide, or take the plunge using the Speed Slide.

All play features fit with Kanopé's signature design – inspired by nature, with a contemporary, streamlined look.

The range is available in two styles: evergreen and oak effect.

Since its introduction, the Kanopé range has continually evolved, offering new and ever more innovative play features.

## 2017

The range provides a new aesthetic environment, inspired by nature in a contemporary way.

*Kanopé, the adventure continues under the treetops*

## 2018

Kanopé reaches for the sky with its majestic towers, aerial and luminous, of up to 8m high.

*Kanopé, the adventure continues... higher, further... to other worlds*

## 2021

Kanopé strengthens its range with new playful and inclusive structures designed for all age groups from the very young to older children: Ka'Yop Trees.

*Kanopé, the adventure is played out inside, outside - everywhere*

Proludic,  
tell us the  
story of  
Ka'Yop!

*Once upon a time...*

*In the Proludic Research & Development laboratory, our designers decided to create a new tree in the Kanopé family... Since Kanopé is in blossom all year round, they extracted a tiny seed, studied it, removed its outer shell, transformed it, enriched it, then decided to plant it...*

*A few months later, watered with reflection, consideration and consultation... enhanced through trials and tests... the tiny seed awoke from dormancy, germinated, emerged from the ground and grew into... Ka'Yop.*

*The different varieties of Ka'Yop trees:*

*Ka'Yop Essential,  
Ka'Yop Dynamic,  
Ka'Yop Inclusive,  
Maxi Ka'Yop,  
Ka'Yop Spiral*

Discover the story in  
video of how Ka'Yop  
trees were created

## KA'YOP

**FULL OF SECRETS INSIDE, OUTSIDE - EVERYWHERE**

Ka'Yop is an enchanted tree that will delight both children and teens with its wealth of exciting play activities.

The lower part contains collaborative and inclusive play elements. Play panels, sound-play, climbing nets, moving seats and rotating play features are spread over the 4 structures.

The upper part, with its lush green foliage, transforms the tree into a leafy cocoon, containing a wide variety of motor and sensory activities.

# KANOPE - THE TALL TOWERS

MULTIPLAY EQUIPMENT

These majestic, ethereal tall towers, as high as 8 metres, will make an impact in any environment.

Children can climb a rope staircase to reach asymmetric play houses perched high at the top of the towers - giving each child a commanding view and a special space above the action.

A large 'Kayak' spiral slide guarantees a thrilling ride all the way back down.

## Sample multi-age combination

- ✚ From 2 years
- ✚ For a wide age range
- ✚ 31 play activities
- ✚ Up to 75 children

## 2 examples of Ka'Yop structures able to connect with other Proludic ranges

### Large Kanopé tower

- ✚ A towering 6m high structure with spiral slide and climbing net

### Kanopé multi-play structure

### Ka'Yop Dynamic tree

- ✚ Multi-age structure supporting physical exercise and the use of fine motor skills

## Sample combination for young children

- ✚ From 2 years
- ✚ 27 play activities
- ✚ Multiple ground-level activities
- ✚ Up to 28 children

### Elves Playhouses

### Diabolo Baby range

### Mini Ka'Yop

Designed like a town, the play area provides a meeting point for children aged 2 to 12 years who want to test and develop their motor skills. This provides opportunities for children who are eager to find excitement, adventure and other children to talk to.

The style of the Biibox range is contemporary, with a look that combines flowing curves utilising predominantly metal materials, highlighted by brightly coloured panels.

Its modular design allows a solution to be found for all requirements and enables it to fit effortlessly into the surrounding environment.

The Ixo range speaks the language of pre-teens.

No longer satisfied with playing the same games as younger children, pre-teen boys and girls want to be challenged - to test their strength, to prove themselves in the eyes of others, to make their own rules.

Inspired by modern architecture, the Ixo range is contemporary in style, with clean lines and transparent structures.

The range is available in two styles - choose from metal or wooden posts - to create a more urban or more natural effect.

## THEMED EQUIPMENT

Our themed play equipment fires up the imagination. Children can dream of being adventurers on boats, trains, rockets and fire engines. They can imagine lions and dinosaurs. They can create their own world around our playspace themes: Adventure, Metropolis, City, Aquatica and Medieval.

They can express themselves freely, stimulated by the many details and unique elements on every piece of equipment.

Our Adventure-themed equipment transports children into the leafy undergrowth of the jungle. Whether climbing aboard a jeep or carefully crossing the suspension bridge, young explorers can go in search of a secret temple and come face-to-face with wild animals along the way.

Each structure is equipped with a range of play elements that challenge and stimulate the senses.

The use of an orange, brown and green colour palette, emphasises the tropical forest theme.

The Metropolis range welcomes children to a world that draws its inspiration from the books of science fiction writers such as Jules Verne and H.G. Wells. The play structures are weird and wonderful machines, each complete with unique design details and imaginative play features.

The combination of stainless steel posts and copper coloured panels reinforce the futuristic look of the equipment.

To set sail across the stormy seas and shipwreck on a desert island. To drop anchor and go fishing with friends.

Children can create any number of adventures around our water-themed playgrounds. Each structure in the Aquatica range is equipped with numerous play elements designed to develop motor and fine motor skills, and stimulate the imagination.

**GRAFIC  
GAMES**

The Medieval theme transports children to a world of knights and chivalry.

Symbols from this period such as turrets, shields and bridges adorn the play equipment. When combined with children's imagination the equipment becomes the starting point for a host of fun adventures. The numerous play panels add to the theme and test children's problem-solving skills.

## MOVING EQUIPMENT

Popular with younger and older children alike, moving play equipment provides a key focus of activity, offering a wide variety of sensations: swinging and balancing, rocking and gliding, moving through space, fast and slow.

Children will love the dynamic experience of our cableways, spring motion and rotating equipment.

Springers are an essential element of play spaces for young children. They enhance a toddler's sense of balance and help them coordinate their movements, while giving older children great fun as they swing wildly.

Springers are equipped with suitably-sized footrests and handles, so they're ergonomically designed for maximum user comfort and safety. Their playful and colourful shapes are based on familiar themes, designed to stimulate a child's imagination.
