

ABS lifting station Sanisett 1 and 2

Synthetic, single or twin pumping station, for the effective dewatering of buildings and areas below the sewer level in accordance with EN 12050-2. Designed as a complete waste-water sump for above- or below-ground installation and for fitting with ABS pumps from the Robusta, Coronada, Piranha and MF ranges. The Sanisett 2 is suitable also for the pumping of sewage containing faecal matter outside of areas covered by EN when installed using Piranha pumps.

Features

- Globular shape for extra strength. Below-ground version has manhole cover with floor run-off and option of odour lock with aeration and venting. Above-ground version with plastic lid (accessory).
- Universally adjustable in height and can be swivelled, thus allowing easy alignment with floor levels and tiling patterns, independent of the inflow or direction of the discharge lines.
- Sanisett 1 for one KS version pump (Coronada, Piranha, MF) or pump with built-in level control (Robusta).
- Sanisett 2 for two non-KS pumps. Separate KS level control system, with support bracket for discharge line junction piece and KS float switches.
- Two inflow ports at 90° offset (DN 100/150) for DIN push-on connection. One port DN 70 for venting and use as a cable duct (supplied as standard with plug/cable inlet seal). One discharge port DN 50 with 63 mm Plasson adaptor.
- Plastic cover for protection of the floor grating during installation work supplied as standard.
- Heads up to 20 m with Piranha 08/09 pumps.
- Suitable for use as a floor drain.
- Maximum allowable temperature of medium 40 °C, short term to 60 °C (max. 5 minutes).

Materials

Description	Material
Tank	Polyethylene
Robusta	
Pump Housing	PP
Rotor Shaft	Stainless steel 1.4028 [AISI 420]
Impeller	PA
Seals	NBR
Cable	Neoprene
Coronada	
Pump Housing	Stainless steel 1.4301 [AISI 304]
Motor Housing	Stainless steel 1.4301 [AISI 304]
Rotor Shaft	Stainless steel 1.4305 [AISI 303]
Impeller	PPO
Cable	Neoprene
Piranha 08/09 and MF	
Upper Lid	Stainless steel 1.4301 [AISI 304]
Motor Housing	Cast iron EN-GJL-250
Rotor Shaft	Stainless steel 1.4021 [AISI 420]
Volute	Cast iron EN-GJL-250
Impeller *	Polyamide
Seal	Neoprene
Fasteners	Stainless steel 1.4401 [AISI 316]

* Piranha 09: cast iron EN-GJL-250

Tank

Synthetic, corrosion-resistant, gas- and odour-tight tank, in accordance with EN 12050-2. Supplied as standard with cover, seals, junction piece, pipe adapters and support bracket. Pump(s) and installation kit not included.

Capacity: 180 litres

Weight: 14 kg (without pump)

Motor

Water pressure sealed, squirrel cage 2-pole induction motor.
Insulation: Class F to 155 °C
Protection type: IP 68

Pump Types

- ABS Robusta light drainage pump 200 WTS, for pumping of ground and rain water, water from hand-basins, and washing machine effluent.
- ABS Coronada light drainage pump 250 WKS. For wastewater (as Robusta above), but suitable also for aggressive ground water thanks to the stainless steel pump housing and a mechanical seal for shaft sealing.
- ABS light wastewater pump MF 154 W to 804 D, for wastewater with large solid particles present. Up to 40 mm solids passage.
- ABS Piranha submersible grinder pump 08/09 with heads up to 20 m which can be used to cut up and pump wastewater containing solids.

(1) = Piranha shredding system

* P₁ = Power at mains, P₂ = Power at motor shaft; ** 3 m with EURO plug (single phase) or CEE plug (three phase)

Performance Curves 50 Hz

H = Total Head; Q = Discharge Volume
Curves to ISO 9906

Installation

Attention to the backwash level is of vital importance for effective dewatering. All outflow points located below the backwash level must be protected against back flow according to standard EN 12056.

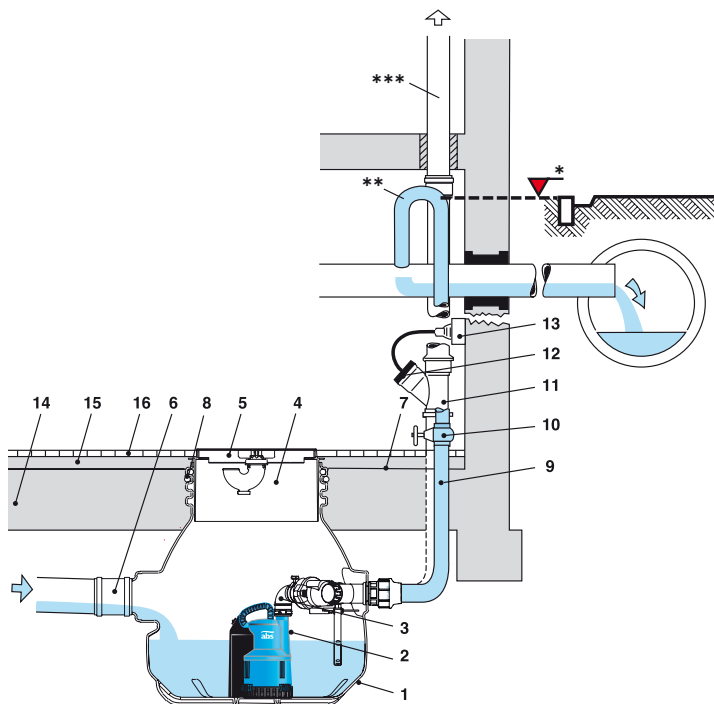

Example: Sanisett 1 underfloor

1. Polyethylene tank
2. ABS wastewater pump with TS level-control system
3. Bend with non-return valve
4. Upper fitting
5. Cover plate with floor run-off and odour lock
6. Inflow port
7. Damp-proof course
8. Seal
9. Discharge line
10. Shut-off valve
11. Vent/cable duct DN 70 brought to above roof level
12. Cable inlet, odour tight
13. Earthed socket
14. Concrete
15. Screed
16. Floor tiles

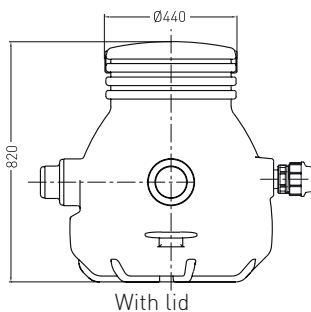

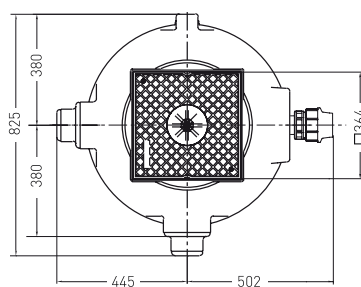

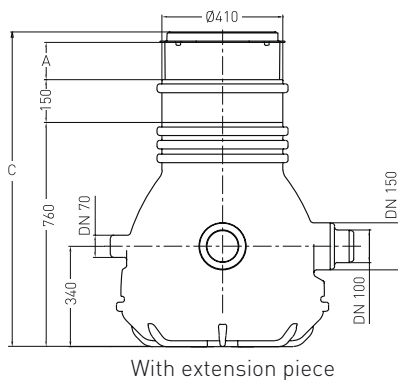

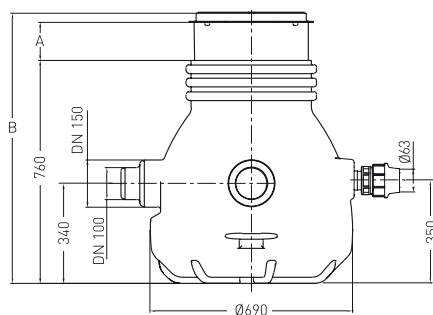

* Backwash level

** Backwash loop with base above the backwash level

*** External ventilation pipe

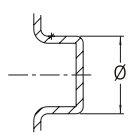

Dimensions (mm)

Inlet Diameters

Ø	[mm]
DN 70	+0.2 ø75 -1.0
DN 100	+0.3 ø110 -1.0
DN 150	+0.4 ø160 -1.5

A = 130 max
B = 790 min, 920 max
C = 940 min, 1070 max

Sanisett 2 / Piranha 08/09	200	240	75	46	19

Accessories

Description	Part No.
Installation Kit: Robusta, Coronada, MF 154-334 G 1½" external thread	62665192
MF 354-804 G 2" external thread	62665193
Piranha 08/09 G 1½" external thread	62665194
Complete as discharge line with non-return valve and flexible connector. For Sanisett 2 an installation kit is required for each pump.	
Sump Extension - one only to max. 150 mm may be used	62665196
Odour-lock Kit	62665195
Above-ground Lid	62665197
DPC Connection Kit - cast iron with sealing ring for connecting to damp-proof course	62665198
Frank Seal Kit	62665231
Lid Insert (stainless steel) - closes and seals run-off vent in manhole cover	41025020
Electrical	
Plug-in Alarm Kit NSM05 - for connection to 230 V (Euro) socket	62450038
Wall-mount Alarm Kit NSM05 - with cable for connection to other socket types ABS alarm and signalling units. Alarm has test button, alarm cancel button, alarm LED, connection for alarm signal, acoustic alarm signal, voltage-free NO (Normally Opened) contact (I max 2 A / V max 25 V) for connection to remote alarm. Rechargeable accumulators for mains-independent alarm signal and alarm signal unit NSM05.	62455012
Plug-in Alarm - as in alarm kit but without NSM05	16020201
Wall-mount Alarm - as in alarm kit but without NSM05	16020203
NSM05 Alarm Signalling Unit (Broken Finger) - with 5 m cable	62665147
Float Switch Level Control: KS 5 = 5 m cable	62450016
KS 10 = 10 m cable	62450017
with Sanisett 2 use two floats	
NC-AKKU - 9 V rechargeable battery for mains-independent operation	12820018
Control Panel (for Sanisett 2) - with plastic housing, fuses, selector switch Hand-O-Automatic, switching relays with over-current release, run and fault lights, direction of rotation indication (for three-phase versions), Alarm with horn potential-free fault signal operating, voltage 230 V or 400 V, 50 Hz, terminal block. Contact ABS for further information
