Mail delivery solutions for the 21st century

DAD mailboxes are designed with the end user in mind, ensuring safe and secure means of receiving mail. There are a number of key benefits to installing a DAD mailbox system.

Internal or External Use
All mailboxes are suitable for internal and/or external use.

5 year guarantee
All powder coat enamelled mailboxes are guaranteed for 5 years. The same painting process and quality of paint is used as in the car industry (100% polyester). Stainless steel boxes are guaranteed for 10 years.

Noise Reduction & Water Prevention
Each mailbox flap has a gasket seal to guarantee water tightness and reduce noise. Large gutter and draining holes further improve water tightness in heavy rain.

Security
Each mailbox has the option to be supplied with a 5 pin cylinder lock and can then be suited with other cylinder locks in the block of flats.

Anti-Vandalism
Extra resistant anti-vandalism locks with a 14cm high reinforced stainless steel cam and 3 bolts can be fitted on some mailboxes.

Intercom
Intercom systems can be integrated into any bank of mailboxes and are available with a range of colour options, grilles and finishes.

User Friendly
Each security lock is supplied with 2 numbered keys and perspex nameplates allowing information to be easily amended when mailbox owners change.

Cleanliness
Most mailboxes are equipped with a flap preventing the entry of dust and other particles.

Durability
Stainless steel hinges and fixings ensure optimal durability.

Design
To ensure the mailbox system ties in with the look and feel of its surroundings, a number of additional features are available such as engraving, large flaps, grilles and different finishes; powder coated enamel, anodised aluminium and stainless steel.

Mail delivery solutions for the 21st century

DAD mailboxes are designed with the end user in mind, ensuring safe and secure means of receiving mail. There are a number of key benefits to installing a DAD mailbox system.

**Internal or External Use**
All mailboxes are available for internal and/or external use.

**5 year guarantee**
All powder-coated mailboxes are guaranteed for 5 years against rust. The same painting process and quality of paint is used as that in the car industry (100% polyester). Stainless steel boxes are guaranteed for 10 years.

**Noise Reduction & Water Prevention**
Each mailbox flap has a gasket seal to guarantee water tightness and reduce noise. Large gutter and draining holes further enhance water tightness during heavy rain.

**Security**
Each mailbox has the option to be supplied with a 5 pin cylinder lock and can then be mixed with other cylinder locks in the block of flats.

**Anti-Vandalism**
Extra resistant anti-vandalism locks with a 14cm high reinforced stainless steel cam and 3 bolts can be fitted on some mailboxes.

**Intercom**
Intercom systems can be integrated into any bank of mailboxes and are available with a range of finishes, grilles and finishes.

**User Friendly**
Each security lock is supplied with 2 numbered keys and perspex nameplates allowing information to be easily amended when mailbox owners change.

**Cleanliness**
Most mailboxes are equipped with a flap preventing the entry of dust and other particles.

**Durability**
Stainless steel hinges and fixings ensure optimal durability.

**Design**
To ensure the mailbox system ties in with the look and feel of its surroundings, a number of additional features are available such as engraving, large flaps, grilles and different finishes: powder coated enamel, anodised aluminium and stainless steel.

DAD UK Ltd
Mail delivery solutions for the 21st century
With production sites and offices across Europe and over 400 employees, the DAD Group has over 130 years experience in delivering solutions that meet the specific requirements of different countries.

Access and security are two issues that are prominent features in modern day lifestyles.

Most modern refurbishment projects for apartment blocks or groups of housing need to provide not only an access control scheme but also safe and secure means of receiving mail. The DAD Group, is the leader in this field. It has a wealth of experience in manufacturing high quality mailboxes that are specifically designed to meet the requirements of the end user. DAD mailboxes are now approved and used by many key players in the building industry and the main European Post Offices.

With high technology production facilities, in excess of one million mailboxes are manufactured each year. Each DAD mailbox conforms to European Norm Quality Control Levels to ensure that the boxes produced are of a high standard.

The highly experienced Research & Development team are continuously focused on developing a range of products with additional options and finishes to adapt to most requirements. Their objectives are also to ensure that their products work in harmony with the architecture and interior design schemes of developments.
Access and security are two issues that are prominent features in modern day lifestyles. Most modern refurbishment projects for apartment blocks or groups of housing need to provide not only an access control scheme but also secure means of receiving mail. The DAD Group, in the sector of high-quality mailboxes, is the leader in this field. It has a wealth of experience in manufacturing high-quality mailboxes and is the only company to be approved under the DAD Group’s Quality Assurance to European Norm Quality Control Levels to ensure that the boxes produced are of a high standard.

**Heavy Duty**

First anti-vandalism mailbox in the UK built in response to today's need for security while maintaining a stylish appearance.

**Telescopic**

Designed for use in masonry cavity walls either individually or grouped in multi-tenanted buildings requiring a collective delivery point.

**One-Piece Frontplate**

Most appealing for front delivery rear retrieval, either through cavity wall, glazing panel or a timber frame.

**Wall Applications**

Front delivery front retrieval boxes are mainly mounted onto or flush into the wall. Available for use internally or externally.

**Freestanding Applications**

For situations where space is restricted or wall cavity is not very deep, these boxes provide a well-designed flexible solution.
Security is a key concern in today's world. In order to respond to these needs, the DAD Group have developed a range that specifically meets security requirements. This range is the first of its kind to be introduced in the United Kingdom. The ‘Heavy Duty’ range brings increased features without detracting from the general appearance and function of the mailbox. The anti-vandalism features and robustness of this range of boxes make them the most secure on the market for front delivery and front retrieval applications.

The body is manufactured from galvanised steel. The front door and flap are made of 3mm reinforced aluminium. An anti-vandalism perspex nameplate is fitted as standard as well as a security lock.

Mail delivery solutions for the 21st century

Model HD1, powder coated RAL 9006
The boxes in this range are designed to be built into masonry cavity walls. They can either be installed as single units or grouped together in multi-tenanted buildings requiring a collective delivery point.

The body is manufactured from galvanised steel in a two part telescopic construction, which simply slides out to suit any wall thickness between 260mm and 500mm. Available in different overall widths, the units are designed to accept standard A4 mail.

The front plate and flap are made of extruded aluminium with a perspex nameplate. The curved flap design enhances the appearance and each flap has gasket seals to ensure water-tightness. An internal anti-theft device is also fitted as standard behind the flap. The lockable inner door is fitted with a security lock. Some finishing profiles are fitted around the front plates to hide plasterwork around the boxes.

* Front plate only.
Model 2375, silver anodised aluminium front plate
This mailbox system is the most appealing for front delivery and rear retrieval. The system can be fitted through a cavity wall, by an entrance door through a single/double glazing panel or in any frame. Its one-piece design makes the unit neat and offers the latest improvements against vandalism. Made to measure, the front plate is made of 3mm thick aluminium or stainless steel and can be adapted to any configuration. The curved flap design enhances the appearance. Each flap has gasket seals to ensure water-tightness.

The mailboxes can be adapted in finishes and sizes to suit any exterior or interior location and all come with a lockable inner door (cylinder with 2 keys). An internal anti-theft device is also fitted as standard behind the flap.

- Any RAL powder coated enamel
- Anodised aluminium* Silver/Gold/Bronze
- Stainless steel*: Rust proof (10 year guarantee)

*Front plate only
Model 2700-1, one-piece front plate RAL7047
In most cases of front delivery and front retrieval, the mailboxes are mounted onto or flush into the wall. They can be positioned either outside against a wall or on an internal wall in a lobby area.

These mailboxes are made of electro-galvanised steel with door and flaps in aluminium or stainless steel. All mailboxes will take standard A4 size mail. An internal anti-theft device is fitted as standard behind the flap and it also has good weatherproof features. All boxes have a lockable door with a security lock complete with 2 numbered keys.

Please see page 24 for casings.
Model 2030-1N, powder coated RAL 1015
During the last century, timber pigeonholes were the most common way of delivering mail in places such as Halls of Residence.

The DAD Group have successfully launched two ranges of mailboxes, catering especially for high volume users. The mailboxes in these systems are now made of metal for improved security and durability. All boxes have a lockable door with a security lock complete with two numbered keys. These boxes are only suitable for internal use.

In situations where there is not enough wall space, the wall cavity is not very deep or the mailboxes are simply required to stand alone, the DAD freestanding range provides a number of well-designed solutions to meet these requirements. These can be installed internally or externally. The wide choice of surrounds and frames allow the units to be integrated with either the interior or exterior decor of the building.

The mailboxes and other components can either be made of electro-galvanised steel with door and flaps in aluminium or in stainless steel and take standard A4 size mail. Each flap has gasket seals to guarantee water-tightness. An internal anti-theft device is fitted as standard behind the flap and the boxes in this range have good waterproof features. All boxes have a door with a security lock complete with 2 numbered keys.

*Door and flap only*

Please see page 24 to select suitable surrounds or stands.
Model 2030-1 powder coated RAL 8019, RRR frame in stainless steel, EP casing RAL 8019
The following different surrounds and stands, are suitable for use with the Wall Application or the Freestanding ranges and are indicated accordingly below. Apart from their practical uses, they also provide a neat finish to the mailbox systems, whether used for one or more boxes, ensuring they are housed and supported suitably. The surrounds and stands are all available in matching finishes and colours to suit the base unit and with different angles and features they provide an enhanced look.

**Surrounds and Stands**

- **PE Surround**
  - Surround for **in wall** applications only
  - Right-angled shaped aluminium profile

- **PR Surround**
  - Surround for **in wall** application only
  - Rounded profile frame, coated in zinc

- **EP Surround**
  - Surround for **against the wall** applications or **freestanding** mailboxes only
  - Right-angled surround, in aluminium

- **PRD Surround**
  - Decorative rounded surround for **against the wall** applications or **freestanding** mailboxes only

- **Rain deflector**
  - Aluminium profile to prevent rain from running down the face. Suitable for PR and PRD surround only
RTG Frame
Rectangular aluminium frame for bolt fixing or fixing into concrete. Base plate for bolt fixing available as an extra. The frame is for freestanding applications only.

RRR Frame
Steel tubular frame for bolt fixing or fixing into concrete. Base plate for bolt fixing is available as an extra. The frame is for freestanding applications only.

RF Stand
Tubular stand for bolt fixing or concrete fixing. Available in variable lengths. The stand is for freestanding applications only.

PFE Frame
Rectangular aluminium frame for bolt fixing or fixing into concrete. Base plate for bolt fixing available as an extra. The frame is for freestanding applications only.

All frames and stands on pages 24 and 25 are available in any of the standard finishes or special powder coated enamel colours. Anodised finishes, or stainless steel, are also available depending on the chosen finish of the box.
Each mailbox system can be specifically designed to ensure it meets the requirements of the end user and ties in with the style of the building and any design schemes. The DAD accessories range offers a number of different optional features, which can be used to make up a system that meets your very own requirements.
