Containerised Trees

All trees are grown using the Australian AirPot System.

The benefits of this system are:

-  The best root system
-  No root spiralling
-  Ease of handling, i.e. wire wrapped root balls supplied to site
-  Environmentally friendly
 - Recyclable
 - No waste material transported to site
 - All materials used from sustainable resources
-  More economical transport
-  Quick establishment, both in container and on site

Clients' benefits:

-  Seasonal or minor contract changes can be accommodated
-  Ideal contact for growing with greater flexibility over traditional methods

Field Grown Trees

-  Trees grown on generous spacings, regularly transplanted on a strict rotational basis
-  Regular pruning
-  Expertly developed by our trained staff, drawing on knowledge from the United Kingdom and Europe
-  Modern lifting and transportation techniques
-  Grown on rich organic soil

Deepdale in Motion
