● Commercial Diving

● Oil Pollution Control

● Air Systems

● Workshop Facilities

● Equipment for Hire

Our range of services from E.D.S have been developed over 12 years to ensure that quality is always key.

Our services include:

#### Oil Pollution Control

- Emergency Spill Response
- Oil Recovery Equipment
- Containment Booms
- Installation and Maintenance
- Consultancy
- Training
- Hire (short or long term)

#### Commercial Diving

- Video Inspection
- Media diving services
- Welding and Cutting
- Marine Salvage
- Ship Repairs
- Bridge and Culvert Repairs
- Underwater Concrete/Grout work
- Boat Hire
- Dredging

#### Workshop Facilities

- Precision Engineering
- Computerised Machinery
- Steel Fabrication

#### Air Systems

- Breathing Apparatus Hire
- Sales and Servicing
- Confined Space Work
- Breathing Apparatus Training
- Mandatory Servicing
- Air Purity Testing
- Filtration for CO
- CO2 Removal

More information is available from the menu opposite.

## Underwater Engineering

We specialise in underwater engineering and are experienced in the following:

- Impressed current cathodic protection systems
- Sacrificial anodes
- Pumping concrete underwater
- Underwater welding and burning
- Salvage and recovery
- ROV operations (using our unmanned submarine for underwater inspections video or searches)
- Assisting the Police in underwater search and recovery
- Boat hire

Our experience covers a wide range of services in a variety of locations.

## Oil Pollution Control

EDS have worked on a wide range of products involved with Pollution Control, we have represented OPEC since our business established in 1992.

Their products are tried and test and have been used "in anger" for many spill scenarios including: -

Spill recovery on salvaging vessels or for fixed installation where the pollution problem requires constant recovery.

OPEC has a large range of recovery, containment and emergency spill equipment, if you particular application has a problem with vegetable, mineral or animals oils and fats we are very confident that we a able to introduce an economical and user friendly solution to your problem.

### Services include :

- Boom Opearation
- Rapid Deployed Service
- Clean up operations
- Oil Recovery Procedures
- Fixed Installations
- Short Term Hire
- Maintenance Contracts
- Training

## Air Systems

### Breathing Apparatus Training

Training courses for the safe operation of specialist equipment are offered to a variety of industrial clients including water companies, Civil Engineering firms and any company working in situations with potentially dangerous gases or hazardous environments, such as establishing a safe working system to enter a working blast furnace at a Steelworks or for a paint spraying application for the automotive industry.

### Breathing Equipment Hire and Sales

E.D.S offers advice on sales of new equipment and short term hire on a range of breathing apparatus and air purity testing equipment. Following consultancy with the client, E.D.S will recommend and provide the appropriate breathing system for the application. Our personnel can also be contracted to manage the safe operation of the equipment whilst employees carry out the task.

Systems can include short duration escape sets, comprising a small emergency back up cylinder; self contained breathing apparatus, air line fed masks and filter units for removing Carbon Monoxide and Carbon Dioxide plus other harmful substances from air supplied for breathing.

### Air Systems services including:

- Filtration for CO
- Breathing Apparatus Training
- Servicing
- Safe Operation
- High and Low pressure air purity testing
- Dangerous environments
- Air line fed masks
- Harmful substances
- Confined space training

## Workshop Facilities

Our workshop facilities compliment our 24 hour cover with a fully equipped fabrication and general engineering workshop with CNC lathes and millers.

Enabling us to react quickly and carry out a permanent repair reducing your down time.

The workshops have a capability for large scale production as well as one-off's, we would be delighted to quote to your requirements.

- MIG, TIG, ARC and Gas Welding
- CNC lathe and milling facilities
- CAD design
- Gates
- Barriers
- Fencing
- Ballustrade
- Single or multiple production

### Our workshop includes:

- CAD and CAM systems
- Precision Engineering
- Cutting services
- Skilled workforce
- MIG and TIG welding
- CNC Machinery
