

FalcoLevel

There is a growing requirement for **"two tier"** cycle parking systems; especially in areas of high population densities such as; stations, shopping centres, schools etc. The FalcoLevel is a very innovative and user friendly cycle parking system. It can house **twice as many bikes** in the same area as any standard cycle rack.

Benefits of the FalcoLevel include:

- * easy to use upper tier using stainless steel bearings
- * the bicycle is held stable in the wheel channels
- * accommodates all cycle types (mountain bikes, town bikes etc)
- * bicycles can be chained for security
- * cycle is well supported when being stored
- * lower rack has a sloping wheel channel, so the user does not have to bend between the levels
- * cycle stands are compact with a centre to centre distance of 375 mm
- * can be extended infinitely
- * double or single sided versions available
- * robust construction, hot dip galvanised to BS EN ISO 1461
- * optional powder coating in any of the 192 RAL colours
- * handles of the upper channels are fitted with reflecting tape
- * designed and manufactured by a company with over 50 years experience

Great space saving
Great usability
Great value

It is easy to house a cycle in the upper tier! -

- 1 Hold the handle of the wheel channel by the reflective tape
- 2 Pull and the channel will roll out towards you
- 3 Then lower the channel to its 45° position
- 4 Lift cycle into the channel and push the cycle by saddle ...
- 5 ... until the rear wheel sits comfortably in the groove
- 6 Lift the handle of the channel and support the cycle by the saddle
- 7 Push the channel forward along the stainless bearings
- 8 And roll the channel into position where it locks firmly!

- simple and easy to do for all ages!

single sided

double sided
