

**1 SHEFFIELD STAND (Ø 41.5 MM)**

Part code	Without cross strut
02.008.000	width 900mm for below ground fix
02.008.015	width 900mm, height 800mm with base plates
02.008.700	additional charge for powdercoating in RAL
Part code	With cross strut
02.010.000	width 900mm for below ground fix
02.010.010	width 900mm, height 900mm with base plates
02.010.700	additional charge for powdercoating in RAL
02.100.000	width 1200mm for below ground fix
02.100.010	width 1200mm, height 900mm with base plates
02.100.700	additional charge for powdercoating in RAL

**2 SHEFFIELD STAND (Ø 60.0 MM)**

Part code	Without cross strut
02.560.000	width 900mm for below ground fix
02.560.009	width 900mm, height 900mm with base plates
02.560.700	additional charge for powdercoating in RAL
02.561.000	width 1200mm for below ground fix
02.561.009	width 1200mm, height 900mm with base plates
02.561.700	additional charge for powdercoating in RAL
Part code	With cross strut
02.550.000	width 900mm for below ground fix
02.550.009	width 900mm, height 900mm with base plates
02.550.700	additional charge for powdercoating in RAL
02.551.000	width 1200mm for below ground fix
02.551.009	width 1200mm, height 900mm with base plates
02.551.700	additional charge for powdercoating in RAL

**N.B.** Also available in stainless steel - (PTO) (pages 166 and 167) or in Toaster format (page 172).

**SHEFFIELD STANDS**

Sheffield stands are the most fundamental of cycle parking products. Two cycles can be secured, one on either side with a chain or cable lock. They are available with base plates for surface mounting or with longer legs for below ground fixing into concrete.

Additionally there are options with or without a cross strut and in different sizes. All Falco stands are hot dip galvanised to BS 1461 and additionally can be powder coated.

Normally placed at 800mm intervals, Sheffield stands are a sound, friendly and affordable bicycle parking solution.

**1 SHEFFIELD STANDS (Ø41.5MM)**

Basic Sheffield stand, designed to sit 800mm above ground level. Bolt down base plate or below ground fix (height 1,100mm of which 300mm is set below ground) options.

**2 SHEFFIELD STANDS (Ø60.0MM)**

A more robust stand, designed to sit 900mm above ground level. Bolt down base plate or below ground fix (height 1,250mm of which 350mm is set below ground) options
