Bollards page no. 118. Shelters page no. 222 and 223.

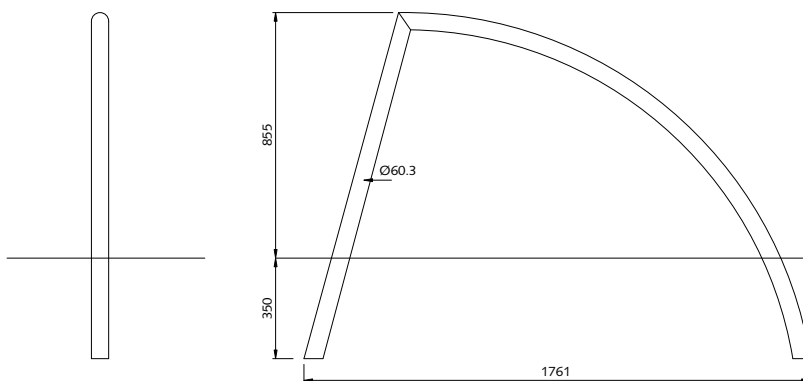

Cycle parking systems page no. 176, 177 and 178.

TRIANGLE

A great design led alternative to the Sheffield stand, the fin shaped cycle stand is part of our 'Triangle' range of co-ordinated street furniture. The design is very user friendly in that it gives all sizes of cycle something to lean against.

With an continuous tube you can attach your bicycle at several spots. The main tube off the stand is 60.3x2.9 mm and can be supplied with anchor parts to grout in or base plates for surface fix. The thick tube gives it a long lifespan. When several stands are installed next to each other then the intermediate distance between the main posts should be at least 750 mm.
