Geberit AquaClean
The WC that cleans you with water.

At the heart of your bathroom: well-being.

Water possesses qualities which have a noticeable effect on our well-being: it refreshes, revitalises and cleanses. Geberit AquaClean goes one step further. You will not just be captivated by the water alone but also by the sophisticated spray principle, combined with specific individual functions.

Discover a new kind of personal hygiene that is gentle, natural, and good for you: with Geberit AquaClean – the WC that cleans you with water.

Imagine you are fitting the bathroom of your dreams: what would you like? More relaxation, more comfort, more design? Then you will fall in love with Geberit AquaClean. Welcome to your new private mini-spa.

For all who place high value
on a good quality of life.

Geberit AquaClean is not a question of luxury but one of meeting the particular needs of your personal quality of life. How much comfort, how many functions, how much individuality you require – the choice is yours. All Geberit AquaClean WC models are characteristically practical, intelligent and easy to clean. Their design qualities will blend in perfectly with contemporary bathroom styles.

The right model for every home.

Want to complete your luxury bathroom with additional feel-good benefits?

Then you will be delighted with the complete solution Geberit AquaClean can offer. The AquaClean models range from simple in function to the more luxurious. With either AquaClean model, their clever technology is designed to make life effortlessly more comfortable.

Geberit AquaClean 8000: The design icon for discerning customers.

At first glance, it looks just like any modern WC that captivates thanks to its elegance and the quality of its design. As well as it being a stylish ceramic unit, Geberit AquaClean 8000 also stands out through the comfort afforded by its spray.

The wall-hung complete solution made from easy to clean ceramic is a winner across the entire line. The strength of the oscillating spray can be adjusted to suit the desired intensity. Naturally, the spray nozzle cleans itself automatically both before and after use.

The spray of fresh warm water cleanses you thoroughly and can be adjusted to suit individual requirements and personal preferences.

Increased ease of operation is just as much part of the concept as experiencing the cleansing spray.

Geberit AquaClean 8000*plus*: The deluxe pampering programme.

The intensity, temperature and properties of the water spray can each be individually adjusted.

The air-purification system starts up as soon as you sit down, dispelling any unpleasant odours.

Drying yourself with warm air is wonderfully comfortable and is also kinder on your skin.

Fine-tune all functions to suit your preferences, save them and then retrieve them again and again.

This complete luxury solution will become the centrepiece of your bathroom: Geberit AquaClean 8000*plus* offers a unique well-being experience that matches its beautifully shaped design.

For a start, the pure spray of water provides unrivalled cleaning quality. Geberit AquaClean 8000*plus* has come up with more features than just this, however: the evenly oscillating spray and the pulsating massage function will increase your sense of well-being even further. There is also the additional comfort of the dryer and a lady shower. It goes without saying that a remote control with storable user profiles is also included.
