Kellen

Brave landscaping for those who are streets ahead of the rest...

HARDSCAPE
unlimited creative opportunities to hard landscaping projects
www.hardscape.co.uk

The Shires, Leicester

Middlesbrough College, Middlehaven

Materials used:
Kellen Tagenta mix setts A-E with random red crystal glass inserts.

Kellen

The ingenious modular concrete paving range from Hardscape hosts a new generation of inspirational paving products that combine the efficiency and integrity of 10% recyclable concrete paving with cement-bonded top layered natural stone aggregate.

Manufactured in Holland, it is available in a variety of colours, finishes and sizes and offers ingenious solutions to hard landscaping schemes.

Sustainable

The Kellen factory has processes in place to reduce dust output into the atmosphere and to save energy and therefore REDUCE CARBON emissions. Recycled water is used in the manufacturing process and raw materials are transported for 90% of their journey by water. As a standard, at least 10% of the raw materials used in the backing layer are from recyclable sources. All products carry a CE mark. As an option products can also be supplied with the Dutch Eco Label (Milieukeur) which guarantees the use of certified recycled building materials for at least 10% in the backing layer.

Sizes

Sizes range from 100x100x80mm to 1000x1000x140mm and can be easily combined with various kerbs and edgings with flexible laying in pedestrian areas and zones with vehicular traffic.

Standards

All products conform to the EN standards 1338, 1339 and 1340 with high quality classes for size tolerance, strength, resistance to freeze/thaw and wear. The material can be laid on sand as a flexible paving system as opposed to laying on cementitious bedding mortars providing a cost effective paved scheme. The final result provides a granite aggregate surface offering a real alternative to natural stone products when circumstances require.

Laying

The product can be machine laid with bespoke machinery that Hardscape have helped develop. Hardscape also recommend using a selected kiln-dried 'silver' sand to complete the final laying for best looking results when using the flexible jointing system from the Kellen range of products.

Cank Street, Leicester

Thomas More Square, London

Haletop, Wythenshawe

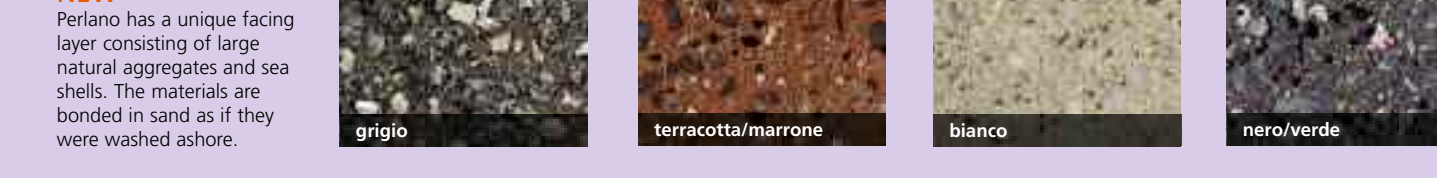

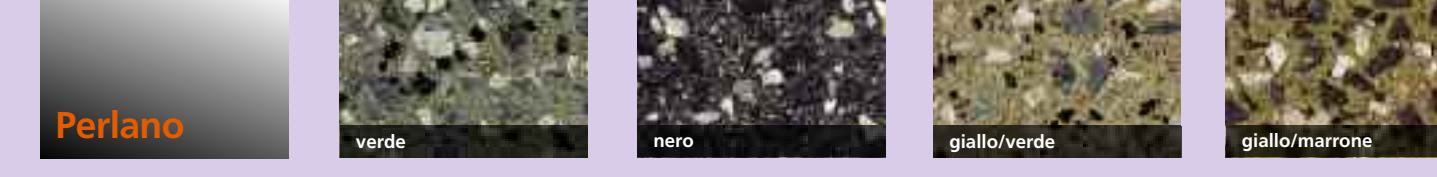

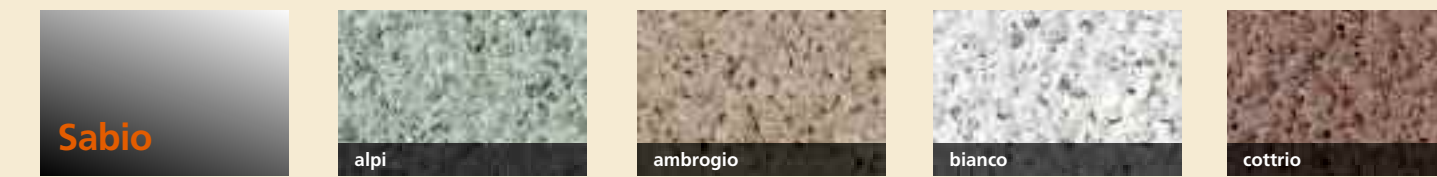

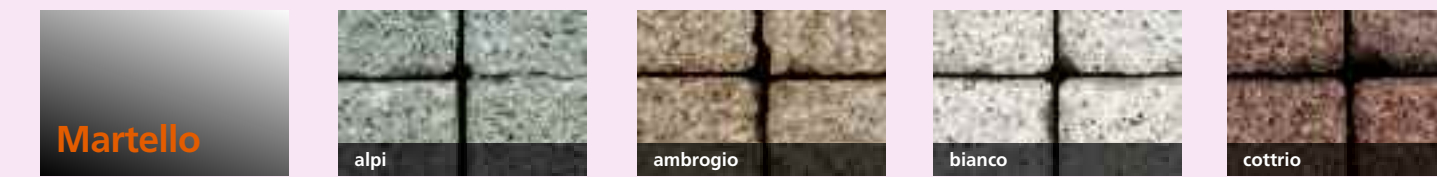

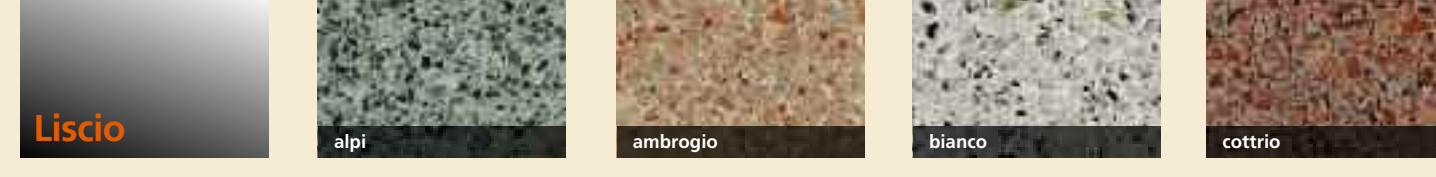

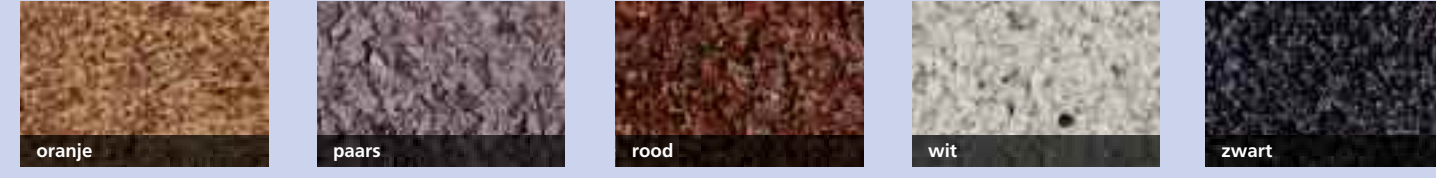

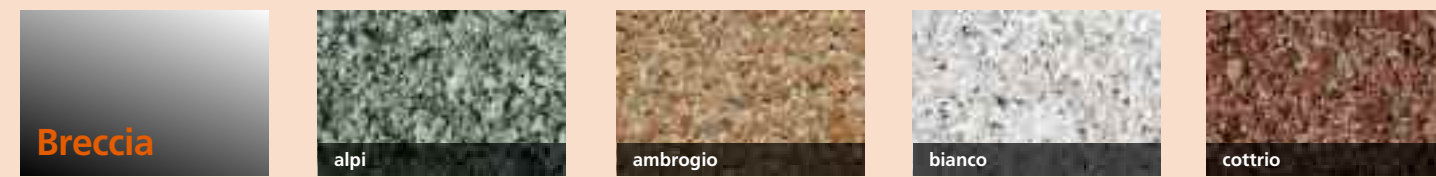

West Street Roundabout, Ashford

Milngavie, Glasgow

Stile Common School, Huddersfield

NEW
Perlano has a unique facing layer consisting of large natural aggregates and sea shells. The materials are bonded in sand as if they were washed ashore.

DISCLAIMER: Due to variations in the printing process this colour swatch represents an approximate guide to Hardscape colour-types of Kellen within this selective range. Please request individual samples to appreciate and confirm colour selection.

Specials

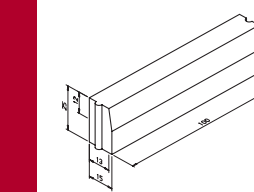

Kellen offers a complementary range of kerbs, planters and steps to form a coherent public space creating its own unique identity. These products are available in 5 standard colours of the Lavaro finish only, including bespoke items which are available upon request and consultation.

Kerbs

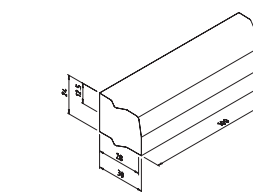

Hardscape has selected a range of kerbs, each having a different way of separating traffic, whether it is visual guidance or physical by height. Each kerb-model offers a wide choice of radii, angles and corners, as well as dropping kerbs. Kellen kerbs are in compliance with EN-1340.

Half Battered Kerbs

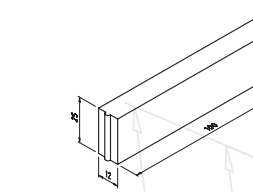

150x250x1000
200x250x1000

Flush Kerbs

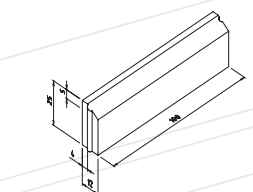

300x240x1000
400x250x1000

Flush Kerbs

120x250x1000
150x250x1000

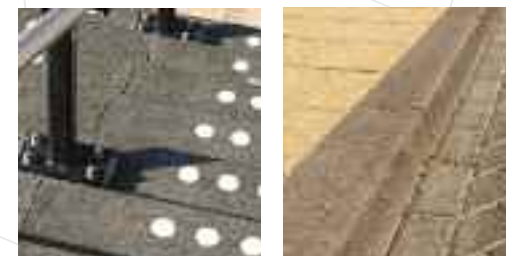

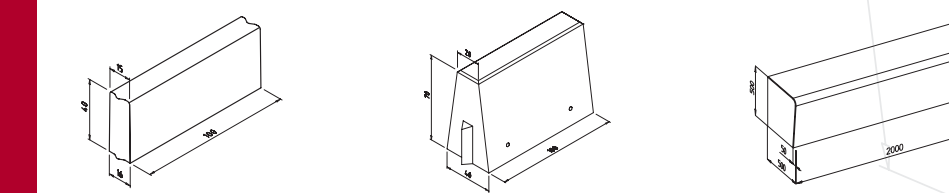

Splayed Kerbs

120x250x1000
200x200x1000

Planters

Kellen planters are available in different sizes and bespoke. Whether used for grass and tree borders or as retaining element to accentuate heights.

Steps

With Kellen steps it is possible to connect different levels in accordance with the paving that is used.
