

# Steel and Stainless Steel Litter Bins

## Albion Bins

# OLLERTON

Albion 120L Standard Bin, with bait option, cigarette ashtray and laser cut text, Halifax.

The Albion litter bin is a functional and versatile bin that can be specified in different sizes and capacities, customised with optional extras such as ashtrays and bait options and finally finished in a livery of your choosing. The Albion litter bin is ideal for most locations including urban, civic and country.

For areas where smaller capacities are required the Albion is offered in 40 and 60 litre models which can also be post or wall mounted. For areas that are popular with dog walkers a co-ordinating dog litter bin is also available.

The Albion has been designed in consultation with those that specify and use litter bins, and specific features have been incorporated into the bin at their request. These include angled apertures to ensure that all litter drops directly into the liner, and the ashtray that can simply be emptied directly into the liner from the exterior of the bin. To ensure long-term aesthetic appearance and functionality most components of the litter bin can be removed and very easily replaced if damaged, component parts are available through our Sales Order Office.

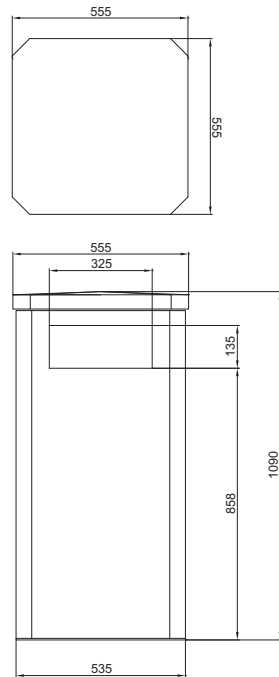

### Standard Specification for Models with 90L to 160L Capacities.

- **Outer:** The body is made from a robust 2mm Zintec steel with a 5mm galvanised base. In addition, to offer further protection the outer is also zinc-rich primed giving excellent protection against rusting.
- **Lid:** The lid is apexed to allow rain run off. The lid is also removable, enabling ashtrays to be retro-fitted or the lid replaced if damaged.
- **Apertures:** Apertures are deep and feature a 45° angle, to ensure litter and cigarette stubs fall straight into the liner.
- **Hinge:** The bin features a demountable, rust-free hinge pin, consisting of a stainless steel rod with nylon bushes that eliminates rusting. The threading rod may be removed and replaced where necessary, this also enables the door to be removed and replaced.
- **Lock and Key:** Stainless steel lock with slam lock mechanism supplied with a hexagonal key as standard. The lock is recessed into body of the bin to prevent damage and it can be replaced if necessary.
- **Drainage Points:** Four drainage holes are drilled into the bottom of the bin.
- **Fixing Options:** The bin is ground or ground-fixed using anchor screws. Four holes are drilled in the bottom of the bin.
- **Liner (Standard):** Liner is 0.9mm galvanised steel with a rolled top edge. It features two handles to front face for ease of removal and four base holes for drainage.
- **Liner Weight:** Approx 9.5kg.
- **Finish (Standard):** Polyester powder coated in black as standard.
- **Detailing (Standard):** Gold Litterman Transfers on two opposite sides and two gold bands supplied as standard.

## ALBION 120L STANDARD BIN
