

Concrete Planters

Classica 1620 Planter in white with Belluno Bench with Natural Stone Inset, Welsh Development Agency

Marshalls Street Furniture offer a wide range of practical and attractive concrete planters. Designs range from the totally utilitarian to those with a more sculptured aesthetic and all are functional. Use concrete planters to enhance urban environments with greenery or colourful floral arrangements. Also, strategically placed, heavy duty planters can be effectively used to guide the flow of pedestrians, limit vehicular access or act as ram-raïd deterrents.

Monoscape planters are available in the standard colours and finishes shown on page 345.

Boulevard is available in a wide range of shapes and sizes allowing an appropriate plant container to accommodate every type of display, from flowers to large shrubs and small mature trees. Each plant container consists of a base unit (with recesses to assist handling) onto which are placed one, two or three rings to achieve the desired height. Plant container rings can be used without the base unit if direct ground cultivation is preferred.

Strada comprises planters featuring clean lines and simple geometric shapes.

Bellitalia features cast concrete planters in simple shapes. Planters are also available enhanced with copper banding and a patented self levelling system. Their functionality can be increased further by adding stainless steel or steel circular seats to the planter body. Highly polished planters are also available in seven colours. Uniquely Bellitalia also features concrete planters with a wrapped copper shell.

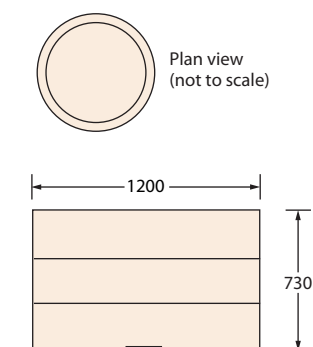

Concrete Planters

Ovito, Scala, Sero

Monoscape

OVITO

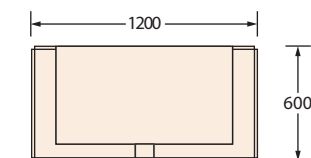

■ Ovito is a modern styled elliptical concrete planter which comes with a separate concrete base to compensate for uneven ground. Available in three colours white green, grey granite or anthracite basalt (black) and enhanced with a fine shot blast finish.

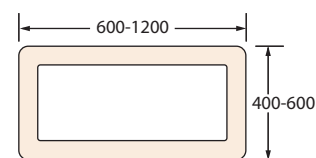

■ Scala is a classically shaped planter in mid grey with a high quality ground finish.

■ Sero planters are available in circular, square and rectangular shapes and also in a variety of sizes, they can be specified to create truly unique planting environments. All Sero planters are grey with a smooth finish to further enhance aesthetic appeal.

SCALA

SERO
