

# Tegula ML

## Concrete Sett Paving

Traditional Tegula, Oaklands, Rugby\*

- Uniquely packaged in a random coursed laying pattern.
- 3 sizes per layer – one pack.
- Installed layer by layer.
- 0.93m<sup>2</sup> layer size.

**Sizes** 240 x 160 x 80mm  
 160 x 160 x 80mm  
 120 x 160 x 80mm  
 (Random Course)

### Colours

Traditional

Burnt Ochre

Pennant Grey

Red/Charcoal Multi

Harvest

### Applications:

Pedestrian, car park and trafficked applications.

Tegula ML is a traditional looking concrete sett paving solution, offering a beautiful finish reminiscent of the sandstone and granite setts found in many parts of the country.

Tegula ML is the paving of choice for conservation areas, the surface texture, colours and pattern have a natural place in the more traditional British streetscape. The range of sizes enables an immediate impact to be made. Tegula ML has all the benefits associated with concrete block paving, in addition the surface has the extra quality of being aged, complementing the built environment around it.

Where a high quality surface, with design versatility is required for a traditional landscape, Tegula ML is clearly the preferred sett paving solution.

Please refer to page 90 in the Concrete Block Paving section for further product details and page 130 for product codes.

# Grassguard ML

Machine Laid Permeable Surfacing Concrete Grass Pavers

Grassguard, Telford College, Edinburgh\*

- Uniquely packaged in a machine installable cluster.
- Installed layer by layer.
- Reduces the need for hand installation.
- 1.0m<sup>2</sup> layer size.

**Sizes** Grassguard 160 600 x 400 x 120mm  
 Grassguard 180 600 x 400 x 120mm

### Colour

Earth Brown

### Applications:

Grassguard ML Concrete Pavers are designed to combat soil erosion caused by the damaging effects of wind and water, wheels and feet. Their high quality concrete composition and open grid pattern help stabilise the underlying material and provide favourable conditions for the rapid establishment of vegetation cover.

When established, Grassguard ML combines the natural appeal of grass with the strength of concrete. The high surface ratio of grassed area to concrete ensures good grass growth, free drainage and a firm surface. The higher ratio of concrete to void on the underside optimises load carrying capability. Grassguard ML is particularly suitable in Firepath, Coastal Protection, Airport and Road and Roadway Drainage applications.

Please refer to page 148 in the Water Management section for further product details and page 130 for product codes.
