

Quality

Manufacturing by Midtherm is carried out in accordance with systems complying with ISO 9001.

Design

Designs are prepared to recognised codes by appropriately qualified engineers with many years experience. Each project is uniquely assessed taking into consideration the specific application and our clients particular requirements.

Computer programmes generated by our own engineers enhance the service we offer to our clients and allow a rapid response covering all aspects of design from foundation loading information through to chimney sizing and performance calculations.

Clients are encouraged to take advantage of this free service.

Fabrications

Steel fabrications are made at one of our factories in the Midlands but occasionally assistance of our associated company Midtherm Flue Systems Limited is required. Some specialist fabrications may be supplied from approved sub contractors.

**16m high mast with HT twin wall flues
Smithwood School - Solihull**

**33m open lattice mast
Bromley Hospital**

50m high mast BBC Head Quarters, South Wales
