

Making Places

snug activity card 6

Children spontaneously create dens and seats - making places to talk, hide and shelter from the sun.

Extensions:

- Discuss what makes a good shelter - Privacy? Comfort? Looks?
- Ask children to identify other materials to improve their shelters.
- Can they work together using all the elements of the kit to create one amazing home?
- Extend into work on seats - which pieces do they sit on? - what makes them comfortable? - how can this inform seat designs?
