Modular composite manifold for up to 12 circuits.

**Description**
- Available in packs to accommodate all underfloor heating projects
- Control, Starter, One and Three Port packs available
- Packs assembled to create 1-12 port manifolds

**Applications**
- From small extensions to new build houses and flats
- Suitable for use with conventional and renewable heat sources
- For the control of heating and cooling systems

Key Benefits
- Add additional circuits/rooms at any time
- Quick and simple balancing using the 'Memory Ring'
- Available in packs to fit any project
- Lightweight and easy to install, no heavy lifting required
- Can be assembled in either left or right handed configurations
- Can supply rooms above and below manifold
- Pressure test through manifold using integrated gauges
- Increased versatility as ports can be installed up or down
