

Humidifan Fans

Intelligent Solutions for Air Quality

The Humidifan range of fans from Envirowise are designed to provide a reliable solution to air quality problems within the home and workplace. Designed with the user in mind the Humidifan can be customised to suit the needs of you and your property.

As standard the Humidifan comes with:

- A manual override facility, putting you in control
- Mechanical shutters that effortlessly glide open when the fan is running and then silently close to prevent draughts
- A ball bearing motor to give peace of mind that the fan will work when you need it most
- Quiet running - so silent you'd hardly know it was there!
- Economic - a cost effective solution to air quality problems
- 3 year warranty

The Humidifan range are available for kitchens, bathrooms and toilets and offer high performance fans whilst maintaining low running costs.

Operation

Under the control of a microprocessor, the sensor continuously monitors the relative humidity in the room. If there is a sudden rise in the relative humidity, the sensor anticipates hitting the set point and activates the fan before it is reached. After the fan has reduced the relative humidity to about 5% below the preset point, the fan switches off. When the fan is running under sensor and microprocessor control a red LED flashes.

A simple pull cord allows the user to override the automatic monitoring should the need arise.

Humidifan Fans

Humidifan Special Features

- Lifetime guarantee on the humidity sensor head
- Three year guarantee on the fan unit
- Ball bearing fan motor
- Integral or remote humidity sensor
